

Advance-Nilfisk Part

Advance-Nilfisk Part - Imagine how long and tiresome it would actually be to clean-up after a party, with no help from equipment. Not too long ago, the dust from carpets and upholstery had to be beat out of them manually; brooms, brushes and cleaning cloths were the top cleaning products at the time.

The founder of Nilfisk-Advance, P.A. Fisker, began as an electrical engineer who liked to work on electrical motors. After starting his business in the year 1906, he began to produce motors to drive fans, machine tools, drills and coffee grinders. Mr. Fisker's dream from the start was to own a worldwide company advertising goods internationally.

The Nilfisk C1 was a tremendous breakthrough for the cleaning industry. This ground breaking vacuum cleaner, invented by Mr. Fisker, weighed just 17.5 kilos and can be operated by a single person. This invention came in a time where other cleaning machines were very big and required 4 or more operators, hence, the Nilfisk C1 transformed everything and developed the manner we clean forever. The mastermind behind these very first cleaning machines remains unparalleled. Cleaning machines provide an excellent solution to an existing dilemma; things get dirty and must be cleaned regularly, without a lot of effort.

Slowly but steadily, Nilfisk-Advance developed throughout the decades. In the 1980s, this growth actually occurred the time the company became a part of the NKT Group. Their new owners' determination and motivation made Nilfisk-Advance take a huge leap forward within the trade, trying to be among the leading universal players in the market of professional cleaning machines. Nilfisk-Advance is now found in every part of the world due to gradually acquiring many small companies to be able to develop their product portfolio and presence in new markets. They are proud to present various cleaning solutions to suit every requirement.
